About Me

Hello! I'm Witold Pacholik, a Computer Science student with a growing passion for backend development. I'm particularly interested in designing robust system architectures, working with APIs, databases, and building scalable server-side applications. I'm focused, analytical, and excited to grow as a backend developer in a business-oriented environment — transforming real-world needs into reliable IT solutions.

Skills

Good knowledge:
- Java
- Spring Boot
- Spring Security
- Hibernate
- SQL
- JUnit
- Mockito
- Maven
- Docker
- Git/GitHub

Basic knowledge:
- C#
- React
- Linux/Bash

Languages

- 🇵🇱 Polish - Native speaker
- 🇬🇧 English - Intermediate

Education

- **2023–2027:** Silesian University of Technology – Engineer's degree in Computer Science
- **2019–2023:** High School – Main subjects: Mathematics, Computer Science

Courses & Workshops

- **Corporate Readiness Certificate (CRC):** Java in Practice – conducted by ING

During the course, I learned how to work with key technologies used in modern Java development. The curriculum covered Git for version control, design patterns, relational databases, and creating frontend applications with Angular. I studied how to use Spring Boot, Spring Security, and Hibernate for building backend systems. I also explored best practices in unit testing, dependency management with Maven, and writing basic CI/CD pipelines and UNIX shell scripts.

Interests

- Football
- Economics and financial markets
